

K1 Haze fluid

JEM K1 Haze Fluid is a water-based haze formula especially developed for the JEM K1 Haze machine. The fluid is optimized in terms of creating haze with a high degree of uniformity and small particles, perfect for beam, mid-air light effects, projections and laser refraction. Besides delivering a unique effect the K1 Haze Fluid is formulated to generate a long operating and hang time. K1 Haze fluid is extremely economical and should yield a low level of consumption when utilized in the dedicated K1 Hazer.

Available in 2.5, 9.5 and 220 l containers.
