

Heavy Fog Fluid (C3 mix)

JEM Heavy Fog Fluid (C3) is a water-based low-fog formula specially designed for use in the JEM Glaciator. JEM Heavy Fog Fluid (C3) fluid produces a dense pure-white ground-hugging effect which will disperse and evaporate before any visible rising. A longer lasting, higher density fog is sometimes required for a more controlled environment and with its longer hang time, C3 formula is well suited for 'waterfall' and 'curtain' type effects or for obscuring scenery and performers in low lying clouds.

Available in 5, 25 and 220 l containers.
