

UM-ONE USB MIDI INTERFACE

Owner's Manual

For the following languages, a PDF version of the Owner's Manual can be found on the CD-ROM.

Deutsch, Français, Italiano, Español, Português, Nederlands

What is MIDI?

MIDI is an internationally recognized standard for exchanging performance information between electronic musical instruments and computers.

For example, in the illustration below, a MIDI signal meaning "the 'C' key on the MIDI keyboard was pressed" passes through the UM-ONE and is received by the computer's software sound module, and then the software sound module plays the note "C."

In this way, MIDI is used to send performance information to other instruments; for example "the 'C' key was pressed with a certain amount of force," "the instrument was changed to a violin sound," "the volume was raised/lowered," "the pitch was raised/lowered," etc. In other words, MIDI is the "language of musical instruments."

MIDI signals are merely performance instructions, therefore a MIDI sound module, such as a software sound module, is required to produce sound.

All software sound modules and DAW (Digital Audio Workstation) software support MIDI.

* DAW software is a term that refers to music production software, such as SONAR.

Note

Do not connect the UM-ONE to the computer until the driver has been installed (p. 9).

Before using this unit, carefully read the sections entitled: "USING THE UNIT SAFELY" and "IMPORTANT NOTES" (p. 3; p. 5). These sections provide important information concerning the proper operation of the unit. Additionally, in order to feel assured that you have gained a good grasp of every feature provided by your new unit, this Owner's Manual should be read in its entirety. The manual should be saved and kept on hand as a convenient reference.

INSTRUCTIONS FOR THE PREVENTION OF FIRE, ELECTRIC SHOCK, OR INJURY TO PERSONS

About A WARNING and A CAUTION Notices

⚠WARNING	Used for instructions intended to alert the user to the risk of death or severe injury should the unit be used improperly.
	Used for instructions intended to alert the user to the risk of injury or material damage should the unit be used improperly.
▲ CAUTION	* Material damage refers to damage or other adverse effects caused with respect to the home and all its furnishings, as well to domestic animals or pets.

About the Symbols

-	
	The \bigtriangleup symbol alerts the user to important instructions or warnings. The specific meaning of the symbol is determined by the design contained within the triangle. In the case of the symbol at left, it is used for general cautions, warnings, or alerts to danger.
3	The Symbol alerts the user to items that must never be carried out (are forbidden). The specific thing that must not be done is indicated by the design contained within the circle. In the case of the symbol at left, it means that the unit must never be disassembled.
6	The ●symbol alerts the user to things that must be carried out. The specific thing that must be done is indicated by the design contained within the circle. In the case of the symbol at left, it means that the power-cord plug must be unplugged from the outlet.

ALWAYS OBSERVE THE FOLLOWING

WARNING

- · Do not open or perform any internal modifications on the unit
- Do not attempt to repair the unit, or replace parts within it (except when this manual provides specific instructions directing you to do so). Refer all servicing to your retailer, the nearest Roland Service Center, or an authorized Roland distributor, as listed on

- the "Information" page.
- **. .** . . · Never install the unit in any of the following locations.
 - · Subject to temperature extremes (e.g., direct sunlight in an enclosed vehicle, near a heating duct, on top of heat-generating equipment); or are
 - · Damp (e.g., baths, washrooms, on wet floors): or are
 - · Exposed to steam or smoke; or are
 - · Subject to salt exposure; or are
 - Humid: or are
 - · Exposed to rain; or are
 - · Dusty or sandy; or are
 - · Subject to high levels of vibration and shakiness

WARNING

- · Do not place containers containing liquid on this product. Never allow foreign objects (e.g., flammable objects, coins, wires) or liquids (e.g., water or juice) to enter this product. Doing so may cause short circuits, faulty operation, or other malfunctions.
- · Immediately disconnect the USB cable, and request servicing by your retailer, the nearest Roland Service Center, or an authorized Roland distributor, as listed on the "Information" page when:

- Objects have fallen into, or liquid has been spilled onto the unit; or
- If smoke or unusual odor occurs
- The unit has been exposed to rain (or otherwise has become wet); or
- The unit does not appear to operate normally or exhibits a marked change in performance.
- · In households with small children, an adult should provide supervision until the child is capable of following all the rules essential for the safe operation of the unit.
- · Protect the unit from strong impact. (Do not drop it!)

USING THE UNIT SAFETY

WARNING

• DO NOT play a CD-ROM disc on a conventional audio CD player. The resulting sound may be of a level that could cause permanent hearing loss. Damage to speakers or other system components may result.

ACAUTION

• Try to prevent cords and cables from becoming entangled. Also, all cords and cables should be placed so they are out of the reach of children.

 Never climb on top of, nor place heavy objects on the unit.

••• Disconnect all cords coming from external devices before moving the unit.

IMPORTANT NOTES

Placement

- Do not expose the unit to direct sunlight, place it near devices that radiate heat, leave it inside an enclosed vehicle, or otherwise subject it to temperature extremes. Excessive heat can deform or discolor the unit.
- When moved from one location to another where the temperature and/or humidity is very different, water droplets (condensation) may form inside the unit.
 Damage or malfunction may result if you attempt to use the unit in this condition. Therefore, before using the unit, you must allow it to stand for several hours, until the condensation has completely evaporated.
- Do not put anything that contains water (e.g., flower vases) on this unit. Also, avoid the use of insecticides, perfumes, alcohol, nail polish, spray cans, etc., near the unit. Swiftly wipe away any liquid that spills on the unit using a dry, soft cloth.

Maintenance

- For everyday cleaning wipe the unit with a soft, dry cloth or one that has been slightly dampened with water. To remove stubborn dirt, use a cloth impregnated with a mild, non-abrasive detergent. Afterwards, be sure to wipe the unit thoroughly with a soft, dry cloth.
- Never use benzine, thinners, alcohol or solvents of any kind, to avoid the possibility of discoloration and/or deformation.

Additional Precautions

- Use a reasonable amount of care when using its jacks and connectors. Rough handling can lead to malfunctions.
- When connecting / disconnecting all cables, grasp the connector itself—never pull on the cable. This way you will avoid causing shorts, or damage to the cable's internal elements.
- When you need to transport the unit, package it in the box (including padding) that it came in, if possible. Otherwise, you will need to use equivalent packaging materials.

Handling CDs

• Avoid touching or scratching the shiny underside (encoded surface) of the disc. Damaged or dirty CD discs may not be read properly. Keep your discs clean using a commercially available CD cleaner.

Panel Descriptions

Note

Do not connect the UM-ONE to the computer until the driver has been installed (p. 9).

No.	Name	Description
1	USB Cable	Connects the UM-ONE to a computer.
2	USB Indicator	Lights when the UM-ONE is connected to a computer and the computer has detected the UM-ONE.
3	MIDI IN Indicator	Lights when MIDI messages are received from the device connected to the MIDI IN cable.
4	MIDI OUT Indicator	Lights when MIDI messages are sent from the computer.
5	MIDI IN Cable (CONNECT TO MIDI OUT)	Connects to the MIDI OUT connector of the MIDI device (such as a MIDI keyboard) that will be used for MIDI recording or for playing a software sound module.
6	MIDI OUT Cable (CONNECT TO MIDI IN)	Connects to the MIDI IN connector of a hardware sound module when DAW software is used to play the hardware sound module.

Driver Installation

Windows

Mac OS X

Note

Do not connect the UM-ONE to the computer until you are directed to do so.

A "driver" is software that transfers data between the UM-ONE and application software running on your computer, when your computer and the UM-ONE are connected.

1. Start up the computer without the UM-ONE connected.

Disconnect all USB cables other than those for a USB keyboard and/or USB mouse (if used).

Windows

Log on to the computer with a user account that has administrator privileges.

- 2. Exit all applications that are running.
- 3. Insert the included CD-ROM into the CD-ROM drive.

Windows 7/Windows Vista

If the AutoPlay dialog box appears, click [Open folder to view files].

4. Double-click the following file on the included CD-ROM and start the installer.

Operating System	Name of folder (in the [Driver] folder)	File
Windows 7	[Win7]	[Setup]
Windows Vista	[Vista]	[Setup]
Windows XP	[XP]	[Setup]
Mac OS X 10.6 or later	[10.6]	[UM-ONE_USBDriver.pkg]
Mac OS X 10.5 or earlier	[10.4_10.5]	[UM-ONEUSBDriver.pkg]

Refer to the Roland website for information about drivers and compatibility with the latest operating system versions.

http://www.roland.com/

Windows

users: continue from p. 10

Mac OS X

users: continue from p. 12

Driver Installation

Windows

- 5. When a confirmation screen regarding user account control appears, click [Yes] or [Continue].
- 6. When "The UM-ONE Driver will be installed on your computer" appears, click [Next].
- 7. Click [Next] again.

(Windows 7/Windows Vista)

If a dialog box regarding Windows security appears, click [Install].

Windows XP

If the "Software Install" dialog box appears, click [Continue] to proceed with the installation.

If you cannot proceed, click [OK] to cancel the installation. Change the settings as described in "Driver Signing Options Setting (Windows XP)" (p. 20) and try installing again.

8. When "Ready to install the driver." appears, connect the USB cable of the UM-ONE to the computer.

It may take several minutes for the driver to be installed.

Windows 7/Windows Vista

If other messages appear, follow the instructions on the screen. The driver will be installed automatically.

(Windows XP)

"Found new hardware" will appear in the lower-right corner of the screen.

Windows 7/Windows Vista

Windows XP

Driver Installation

13. Confirm that "UM-ONE" appears in the "MIDI Studio" window or the "Audio MIDI Settings" dialog box.

If "UM-ONE" does not appear or if it is grayed out, it means that the UM-ONE is not being detected properly. Click [Rescan MIDI]. Also try disconnecting and reconnecting the UM-ONE's USB cable.

14. Click [Add Device] one time.

One [new external device] will appear.

- 15. Click the added [new external device], and then click [Show Info].
- **16.** In the [Device Name] field, enter "UM-ONE" and click [Apply].

17. Using your mouse, drag and connect the up/down arrows (which represent the input/output ports of each device) of the [UM-ONE] and the [UM-ONE] that you added so that they are connected as shown in the figure.

19. Click the UM-ONE's down arrow.

If the settings are correct, the UM-ONE's MIDI OUT indicator will blink.

- 20. Click [Test Setup] again and complete the confirmation.
- 21. Close the "MIDI Studio" window or the "Audio MIDI Setup" dialog box.

Installation complete.

Precautions Concerning the Use of Software

Before using the UM-ONE with your software, please note the following points.

- Connect the UM-ONE to the computer before starting the software.
- Do not disconnect the UM-ONE from the computer while the software is running. After exiting the software, disconnect the UM-ONE.
- Select the UM-ONE for the software's MIDI device setting.
- The UM-ONE will not operate in the Mac OS X Classic environment. Use the UM-ONE when the Classic environment is not running.

Recording MIDI Data, Playing a Software Sound Module

To transmit MIDI messages from a MIDI keyboard or digital piano in order to record MIDI data using DAW software or play a software sound module, make the following connections and settings.

* When connecting other devices, always be sure to turn the volume down before connecting or disconnecting cables to prevent damage to speakers.

Playing Back MIDI Data

To send MIDI messages that were recorded using DAW software to a MIDI sound module or software sound module, make the following connections and settings.

* When connecting other devices, always be sure to turn the volume down before connecting or disconnecting cables to prevent damage to speakers.

If you experience problems, read this chapter first. It contains tips for solving most problems. If this chapter cannot help you solve a problem, please refer to the support section of our website. If the problem is not resolved, refer to the contact information listed at the end of this document.

Roland support website: http://www.roland.com/

Driver Installation

Problem	Confirmation	Resolution
Installer does not start	Are you attempting to install from a networked CD-ROM drive?	You cannot install from a networked CD-ROM drive.
	Are you logged on with a user account that does not have administrator privileges?	Log on to the computer with a user account that has administrator privileges. For details, consult the administrator for your computer system.
Cannot install	Is the "Driver Signing Options" setting set to [Block]? (Windows XP)	Change the "Driver Signing Options" setting (p. 20).
	Are other programs or resident programs (such as antivirus programs) running?	Be sure to exit all other programs before installation.
Warning or error appears during installation (Windows)	In the "Device Manager," do you see "Other device,""Unknown device," or a device for which "?,""!," or "x" is displayed?	Reinstall the UM-ONE driver (p. 22).
	ls your computer running on battery power?	Connect the power cord to the computer.
Installer does not exit	Other than a mouse and keyboard, are any USB devices connected?	Make sure that there are no USB devices connected to the computer (other than a mouse and keyboard) during installation.
	Is the UM-ONE connected to a USB hub that is connected to a power supply?	Use a USB hub that connects to a power supply.
"Found New Hardware Wizard" appears again after driver was installed (Windows XP) Did you connect the UM-ONE to a different USB connector than the one you used when installing the driver?		If you change the USB connector to which the UM-ONE is connected, the "Found New Hardware Wizard" may appear again even if the driver has already been installed on the computer. Follow step 9 of the driver installation procedure (p. 11) and install the driver.

Problem	Confirmation	Resolution
Numeral such as "2-" appears at beginning of device name (Windows)	Did you connect the UM-ONE to a different USB connector than the one you used when installing the driver?	If you connect the UM-ONE to a different USB connector than the one you used when installing the driver, a numeral may appear with the device name. To have the device name appear without the numeral, connect the UM-ONE to the same USB connector used during installation, or reinstall the driver (p. 22).

Using the UM-ONE

Problem	Confirmation	Resolution	
	Is the driver installed?	Install the driver (p. 9).	
	Is the UM-ONE's USB indicator off?	Make sure that the UM-ONE is connected to the computer correctly.	
		If the problem is not resolved, reinstall the driver (p. 22).	
	Is the UM-ONE's device name displayed?	Exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.	
Cannot select or use UM-ONE device		If the problem is not resolved, reinstall the driver (p. 22).	
	Did the computer enter standby (suspend) mode, hibernate mode, or sleep mode while the UM-ONE was connected?	Exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.	
		If the problem is not resolved, restart the computer.	
	Did you disconnect and reconnect the USB cable while using the UM-ONE?	Exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.	
		If the problem is not resolved, restart the computer.	
	Was the UM-ONE connected to the computer while the computer was starting up?	Connect the UM-ONE after the computer has started up.	
		(With some computers, the UM-ONE cannot be used if it is connected to the computer while the computer is starting up.)	
	Are you using the Media Player included with Windows? (Windows 7/Windows Vista)	Use different software. MIDI devices cannot be selected in Media Player.	

Troubleshooting

Problem	Confirmation	Resolution
Cannot select or use UM-ONE device	Have you configured "Audio MIDI Setup"? (Mac OS X)	Configure Audio MIDI Setup (p. 12).
	Is the driver installed?	Install the driver (p. 9).
	Is the software's input device and output device configured?	Select the UM-ONE as the input and output device (p. 14, p. 15).
		Make sure that the UM-ONE is connected to the computer correctly.
	is the UM-UNE'S USB indicator off?	If the problem is not resolved, reinstall the driver (p. 22).
-	Did you make a mistake when connect- ing the MIDI IN cable (CONNECT TO MIDI OUT) and MIDI OUT cable (CONNECT TO MIDI IN)?	Connect the MIDI IN cable (CONNECT TO MIDI OUT) to a MIDI OUT connector, and connect the MIDI OUT cable (CONNECT TO MIDI IN) to a MIDI IN connector.
	Is the sound module connected to the MIDI OUT cable receiving MIDI signals?	Confirm the settings of the sound module.
	Did the computer enter standby (suspend) mode, hibernate mode, or sleep mode while the UM-ONE was	Exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.
Cannot play back	connected?	If the problem is not resolved, restart the computer.
orrecord	Did you disconnect and reconnect the USB cable while using the UM-ONE?	Exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.
		If the problem is not resolved, restart the computer.
	Was the UM-ONE connected to the computer while the computer was starting up?	Connect the UM-ONE after the computer has started up.
		(For some computers, the UM-ONE cannot be used if it is connected to the computer while the computer is starting up.)
	Did the computer handle a processor-	Stop playback or recording, and then try playing back or recording again.
	intensive task while you were using the UM-ONE?	If the problem is not resolved, exit all programs that are using the UM-ONE, disconnect the UM-ONE's USB cable, and then reconnect it.
	Are you using the Media Player included with Windows? (Windows 7/Windows Vista)	Use different software. MIDI devices cannot be selected in Media Player.

Problem	Confirmation	Resolution
Duplicate notes sound	Is the sound module set to Local On? Is the software's THRU function turned on?	Configure as follows. Sound module: Local Off Software's THRU function: Off For details, refer to the owner's manual for the equipment you are using.
	Are multiple programs running?	Exit programs that are not in use.
	Is the system software up to date?	Run Windows Update or Microsoft Update and make sure the system software is up to date.
	Are you using Mac OS X Software Update?	Run Software Update and make sure the system software is up to date.
Sound is interrupted during playback, sounds are missing	Are the drivers for the computer's internal chipset and graphics card up to date?	Update to the latest drivers.
	Are the drivers for the computer's LAN hardware (wired and wireless) up to date?	Install the latest LAN hardware drivers. If the problem is not resolved, disable the LAN.
	Is the computer's power management function set to energy saving mode?	Configure power management settings (p. 20).
	Is the UM-ONE connected to a USB hub?	Connect the UM-ONE directly to one of the computer's USB connectors.
	ls the driver's [Lighten Load] setting turned off? (Windows)	Place a check in the [Lighten Load] check box (p. 24).
	Did you try to play back or record immediately after the computer started up or after waking up from sleep mode?	Wait and try playing back or recording later.

Changing Computer Settings to Avoid Problems

Changing these computer settings can help you avoid the problems described in "Driver Installation" (p. 16) and "Using the UM-ONE" (p. 17).

Driver Signing Options Setting (Windows XP)

If the "Driver Signing Options" setting is set to [Block], you cannot install the driver. Configure as follows.

1. Open the "Control Panel," click [Performance and Maintenance], and then click the [System] icon.

If you have selected Classic view, double-click [System].

2. Click the [Hardware] tab, and then click [Driver Signing].

The "Driver Signing Options" dialog box will open.

- 3. In the "Driver Signing Options" dialog box, select [Warn] or [Ignore], and then click [OK].
- 4. Click [OK] to close the "System Properties" dialog box.
- 5. Install the driver as described in "Driver Installation" (p. 9).

When you have completed the installation, return the "Driver Signing Options" setting to its original setting.

Power Management Settings

If the sound is interrupted during a performance or if sounds are missing, you may be able to resolve the problem by changing the computer's power management settings.

Windows 7/Windows Vista

- 1. Open the "Control Panel," click [System and Security] or [System and Maintenance], and then click [Power Options].
 - If you have selected icon view in Windows 7, double-click the [Power Options] icon.
 - If you have selected Classic view in Windows Vista, double-click the [Power Options] icon.
- 2. When "Select a power plan" appears, select [High performance].

3. Click [Change plan settings] next to [High performance].

If "High performance" is not displayed in Windows 7, click [Show additional plans].

- 4. Click [Change settings that are currently unavailable].
- 5. In the [Advanced settings] tab of the "Power Options" control panel, click the [+] mark next to "Hard disk," and then click the [+] mark next to "Turn off hard disk after."
- 6. Click [Setting], click the down arrow, and then select [Never].
- 7. Click [OK] to close the "Power Options" window.
- 8. Close the "Edit plan settings" screen.

Windows XP

1. Open the "Control Panel," click [Performance and Maintenance], and then click [Power Options].

If you have selected Classic view, double-click [Power Options].

- 2. Click the [Power Schemes] tab, and set the "Power schemes" to [Always On].
- 3. Click [OK] to close the "Power Options Properties" window.

Mac OS X

This setting is not available on certain versions of Mac OS X.

- 1. Open "System Preferences" and click [Energy Saver].
- 2. Click [Options].
- 3. Set "Processor Performance" to [Highest].

Reinstalling the Driver

If you experience problems installing the driver, use the following procedure and reinstall the driver.

- 1. Delete the UM-ONE's driver.
- 2. Install the driver again as described in "Driver Installation" (p. 9).

Deleting the Driver

If the computer does not detect the UM-ONE correctly, use the following procedure to delete the driver, and then install the driver again as described in "Driver Installation" (p. 9).

Windows

1. Start up the computer without the UM-ONE connected.

Disconnect all USB cables other than those for a USB keyboard and/or USB mouse (if used).

- 2. Log on to the computer with a user account that has administrator privileges.
- 3. Insert the included CD-ROM into the computer's CD-ROM drive.
- **4.** Double-click the [Uninstal] icon in one of the following folders on the included CD-ROM.

Operating System	Folder
Windows 7	Open [Driver], and then [Win7]
Windows Vista	Open [Driver], and then [Vista]
Windows XP	Open [Driver], and then [XP]

- 5. When a confirmation screen regarding user account control appears, click [Yes] or [Continue].
- 6. When "The installed UM-ONE driver will be uninstalled." appears, click [OK]. If other messages appear, follow the instructions on the screen.
- 7. When "Uninstallation was completed." appears, click [OK] and restart the computer.

Mac OS X

1. Start up the computer without the UM-ONE connected.

Disconnect all USB cables other than those for a USB keyboard and/or USB mouse (if used).

- 2. Insert the included CD-ROM into the computer's CD-ROM drive.
- 3. Double-click [Uninstaller] in one of the following folders on the included CD-ROM.

Operating System	Folder
Mac OS X 10.6 or later	Open [Driver], and then [10.6]
Mac OS X 10.5 or earlier	Open [Driver], and then [10.4_10.5]

- **4.** When "This uninstalls UM-ONE driver from this Macintosh." appears, click [Uninstall]. If other messages appear, follow the instructions on the screen.
- 5. When "Are you sure you want to uninstall the driver?" appears, click [OK].
- 6. The authentication dialog box or the message "Uninstaller requires that you type your password" will appear. Enter the password and click [OK].
- 7. When "Uninstallation is completed." appears, click [Restart] and restart the computer. It may take some time for the computer to restart.

Troubleshooting

Lightening the MIDI Load (Windows)

The MIDI load can be lightened in the UM-ONE driver setting dialog box.

- 1. Exit all programs that are using the UM-ONE.
- 2. Open the "Control Panel" and set the display mode as follows.
 - Windows 7: Icon view
 - Windows Vista/Windows XP: Classic view
- 3. Double-click the UM-ONE icon. The "UM-ONE Driver Settings" dialog box will appear.
- 4. Place a check in the [Lighten Load] check box.
- 5. Click [OK].

FEDERAL COMMUNICATIONS COMMISSION RADIO FREQUENCY INTERFERENCE STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Unauthorized changes or modification to this system can void the users authority to operate this equipment. This equipment requires shielded interface cables in order to meet FCC class B Limit.

For Canada -

NOTICE

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

AVIS

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

-For C.A. US (Proposition 65) -

WARNING

This product contains chemicals known to cause cancer, birth defects and other reproductive harm, including lead.
